

**OPTIONS:** for vertical autoclaves, need to be factory fitted.

**Pt 100 Sensor.** 2<sup>nd</sup> Probe for reading sample temperature.

To guarantee in all circumstances that the system has completed the cycle to the set time and temperature parameters, the Autester ST DRY PV II autoclave can be installed with a temperature probe that can be placed within the culture flask, residual packets etc.

When the probe is connected to the controller of the autoclave, it is automatically recognised by the micro-processor, whereby the real time temperature values detected by the probe, are displayed and printed. For autoclaves PRESOCLAVE II this Pt100 sensor only reads the temperature with an external thermometer. Part No. **4001219**
